Introduction

The purpose of this handbook is to provide specific information on policies, procedures, and regulations pertaining to graduate study in the Program in Public Health. It provides information that will be helpful for a new student and gives requirements for the MPH degree. It is neither an exhaustive compilation nor an official statement of requirements. The UCI General Catalogue should also be consulted. The handbook will be revised as necessary and distributed to all faculty and entering students. Our intention is to update this handbook at regular intervals and suggestions for additions and changes are welcome. In instances of conflict between this handbook and either official university publications or more current policy, the latter take precedence. While every effort is made to ensure the correctness and timeliness of information contained in this handbook, the Program cannot guarantee its accuracy.

Departmental Administration

Chair of Public Health
Karen Edwards, AIRB 2083, (949) 824-6350; kedward1@uci.edu

Assistant Chair
Mark Cartnal, AIRB 2082, (949) 824-8874; mcartnal@uci.edu

Director of Graduate Study
David Timberlake, AIRB 2044, (949) 824-3552; dtimberl@uci.edu

Director of Student Affairs
Stephanie Leonard, AIRB Suite 2010, (949) 824-0546; stephapl@uci.edu

Graduate Student Advisor
Malcolm Bourne, AIRB Suite 2010, (949) 824-7095; bournem@uci.edu

Practicum Coordinator
Karen Munoz, AIRB Suite 2010, (949) 824-4026; kmunoz@uci.edu
Accreditation

The Program in Public Health is fully accredited by the Council on Education for Public Health (CEPH) and is a member of the Association of Schools and Programs of Public Health (formerly the ASPH). CEPH accreditation was attained in October 2012 for a full term of five years. More information on CEPH and the ASPPH can be found at ceph.org and aspgh.org respectively. UC Irvine Public Health students are eligible to apply for prestigious ASPPH internships and fellowships while enrolled and post-graduation.

Program Objectives

The program is designed to provide broad coverage of topical areas that underpin public health practice, while providing deeper understanding of specific emphases to accommodate the interests of students from diverse academic backgrounds and/or career goals. The core competencies include five sub-disciplines for which there is general consensus that every public health professional should have a certain level of understanding. ASPPH’s definitions of the core competency areas are as follows:

- **Biostatistics** is the development and application of statistical reasoning and methods in addressing, analyzing and solving problems in public health; health care; and biomedical, clinical, and population-based research.

- **Epidemiology** is the study of patterns of disease and injury in human populations and the application of this study to the control of health problems.

- **Environmental Health** represents the study of environmental factors including biological, physical, and chemical factors that affect the health of a community.

- **Health Policy and Management** is a multidisciplinary field of inquiry and practice concerned with the delivery, quality, and costs of health care for individuals and populations. This definition assumes both a managerial and a policy concern with the structure, process, and outcomes of health services including the costs, financing, organization, outcomes, and accessibility of care.

- **Social and Behavioral Sciences** in public health address the behavioral, social, and cultural factors related to individual and population health and health disparities over the life course. Research and practice in this area contributes to the development, administration, and evaluation of programs and policies in public health and health services to promote and sustain healthy environments and healthy lives for individuals and populations.

The seven cross-disciplinary themes, namely communication and informatics, diversity and culture, leadership, professionalism, program planning, public health biology, and systems thinking, all transcend specific disciplines and must be ingrained in effective public health practice. The UCI MPH curriculum is designed to integrate the cross-disciplinary themes throughout the entire curriculum by focusing a required seminar series. The ASPPH definitions for the cross-disciplinary themes are as follows:
Communication and Informatics represents the ability to collect, manage, and organize data to produce information and meaning that is exchanged by use of signs and symbols; to gather, process, and present information to different audiences in-person, through information technologies, or through media channels; and to strategically design the information and knowledge exchange process to achieve specific objectives.

Diversity and Culture is the ability to interact with both diverse individuals and communities to produce or impact an intended public health outcome.

Leadership in public health is the ability to create and communicate a shared vision for a changing future; champion solutions to organizational and communities challenges; and energize commitment to goals.

Professionalism is the ability to demonstrate ethical choices, values, and professional practices implicit in public health decisions; consider the effect of choices on community stewardship, equity, social justice, and accountability; and to commit to personal and institutional development.

Program Planning is the ability to plan for the design, development, implementation, and evaluation of strategies to improve individual and community health.

Public Health Biology represents the biological and molecular context of public health.

Systems Thinking is the ability to recognize system level properties that result from dynamic interactions among human and social systems and how they affect the relationships among individuals, groups, organizations, communities, and environments.

Master of Public Health Core and Emphasis Competencies

The core competencies for our MPH program cover the main theoretical and methodological subjects and crosscutting interdisciplinary themes that underpin advanced study and professional practice in public health. In developing our core competencies, we considered the recommendations of the ASPH core competency development project.

PH 200: Foundations of Public Health
Analyze the interrelationships between health risk factors and the susceptibility and vulnerability of populations, using the ecological model and case studies of disease prevention.

PH 206: Graduate Epidemiology in Public Health
Apply descriptive and experimental epidemiologic methods to reveal casual associations between the risk factors and disease in populations, and to the development of strategies for measuring and curtailing the dissemination of diseases in a population.

PH 207: Biostatistics
Analyze the health of populations by applying biostatistics methods to describe vital health status, for estimation, projections and hypothesis testing.
PH 222: Health Policy and Management
Analyze the health status of populations on the basis of access health services, cost of care, community structure and governmental policies for the purpose of developing management and policy instruments to prevent disease and improve conditions that support health populations.

PH 244: Health Behavior Theory
Apply behavioral and social science theory to analyze contemporary public health problems with the aim of lessening the disease burden on society and promoting health.

PH 264: Environmental Health Science
Analyze how population exposures to environmental risk factors interfere with human biological systems to produce disease and disability in communities, and apply the analysis to develop strategies for disease prevention and health improvement.

PH 295: Public Health Practicum
Apply theory, paradigms, principles, and methodologies obtained through formal coursework to inform public health practice across community, government, private industry or other institutional settings relevant to public health. Review, critique, and evaluate public health reports and research articles.

MPH Emphasis in Environmental Health
The objective of the emphasis in environmental health is to train public health professionals to protect the quality of human environments by reducing the burden of disease and disability associated with environmental risk factors. Students are expected to have academic backgrounds in the life sciences, physical sciences, or social sciences, though other backgrounds may be appropriate depending on experience. Remedial courses may be recommended for those with particular deficiencies in the natural sciences.

Graduates of the MPH degree with an emphasis in environmental health are expected to gain employment in government environmental agencies, public health offices, non-profit organizations, or proceed to a doctoral program in environmental health. In developing competencies for the MPH emphasis in environmental health, we considered the recommendations of the combined efforts of the National Center for Environmental Health, the Centers for Disease Control and Prevention, and the American Public Health Association. Those competencies fall into three major categories of assessment, management, and communication.

MPH Emphasis in Epidemiology
The objective of the emphasis in epidemiology is to train public health professionals with the skills to assess the distribution of disease and disability in human populations, and the application of this study to the understanding of determinants underpinning morbidity and mortality and strategies for controlling disease in a population. Students are admitted to the MPH emphasis from a variety of backgrounds, but strong quantitative skills are essential. After earning the MPH degree with an emphasis in epidemiology, graduates will be able to explain the role of epidemiology within the broader
context of public health. The competencies can be acquired through a variety of selective and elective courses or directed/supervised independent study with faculty members.

**MPH Emphasis in Sociocultural Diversity and Health**

The objective of the MPH emphasis in sociocultural diversity and health is to train public health professionals to critically analyze social, behavioral, and cultural determinants and correlates influencing the trajectory of maladaptive behavior, disease, and ultimately health disparities existing in populations and communities. The aims of this emphasis are to: 1) know how to conduct a critical and theory-informed analysis of public health problems; 2) create research proposals to investigate the correlates and determinants of public health problems; 3) use the information gleaned from this critical analysis of public health problems to construct health behavior change intervention programs, tailored appropriately for diverse populations; and 4) create research proposals to evaluate health behavior change programs. The MPH emphasis in sociocultural diversity and health attracts applicants from a variety of backgrounds with both a commitment to and passion for addressing health disparities that contribute to vulnerabilities to disease and disability in communities.

In developing competencies for this emphasis, we considered the recommendations of the joint panel commissioned by the ASPH and the Association of American Medical Colleges to develop a set of core cultural competencies appropriate for medical and public health students. Those competencies are meant to support the development and delivery of appropriate population health services for the underserved, and to remediate disparities. The emphasis specifically accommodates training in the diverse population of Orange County and Southern California, and is relevant to UC Irvine’s Program in Medical Education for the Latino Community (PRIME-LC).
The Faculty Mentor

Each MPH student is assigned to a Faculty Mentor. Your Faculty Mentor will advise you on broader educational and career goals and assist with the selection of emphasis and elective courses each quarter. Your faculty mentor will also approve your proposal for your practicum project. We suggest you record your faculty mentor’s name here for future reference:

Faculty Mentor Name: ____________________________
Email address: __________________________________
Phone number: _________________________________

The Graduate Director

The Graduate Director (sometimes referred to as the Graduate Advisor on university forms) is a faculty member in the Program in Public Health who plays a key role in the academic lives of graduate students, advising students about academic policy, approving study lists (see section on Advising, p.19), and reviewing requests for exceptions. Student concerns may be referred to the Graduate Director by the Graduate Student Affairs Office or the faculty mentor as appropriate.

The Graduate Student Advisor

The Graduate Student Advisor tracks degree progress, advises students about program requirements, assigns teaching assistant and reader positions, and refers questions to other staff, faculty, or campus services.

The Department Chair

The Department Chair is a faculty member who serves as the academic leader and administrative head of the department. The Chair should be receptive to questions, complaints, and suggestions from members of the department, both faculty and staff personnel, and from students, and should take appropriate action on them.

More comprehensive information about Public Health Faculty and Staff members with contact information is located on our website.
Getting Started at UC Irvine

This section is divided into two topics: things you need to do before you can start taking classes in the Fall and resources you can use before and after arriving at UC Irvine to get settled into graduate student life. This list of resources is by no means exhaustive. If you do not find the service you need in this section, please refer to the departmental website http://publichealth.uci.edu/; campus website www.uci.edu; or visit our Student Affairs Office for help.

New Student Checklist—Important Things to Do Before Classes Start

These items need to be completed after you accept our offer of admission by submitting the Statement of Intent to Register online to the Graduate Division (http://www.grad.uci.edu/).

☐ Pay “Statement of Intent to Register” Deposit

In order to secure your place in our program and register for classes, you must pay a non-refundable $200 admission acceptance fee. The $200 fee will go towards your mandatory fees for the first quarter of the program. An enrollment hold will be placed on your record until the fee is paid.

☐ Activate Your UCInetID

Though you may have had a UCInetID when you were an applicant, you need to activate your UCInetID as a student after you accept the offer of admission. Your UCInetID is a secure username and password that you use to gain access to your UCI email, registration, bill payment, and many more campus services. You may activate your UCInetID at http://activate.uci.edu by choosing the link for “Faculty, Staff, and Students.”

☐ Submit a Statement of Legal Residence

It is important that you complete and submit the Statement of Legal Residence at https://www.reg.uci.edu/stlr/Welcome.do as soon as possible. Establishing California residency is a key factor in determining whether or not you will need to pay non-resident supplemental tuition. If you need assistance in filling out the form or have questions about your residency status, please contact the UCI Residence Officer at regres@uci.edu or by calling (949) 824-6129.

☐ Clear Provisional Admission

If your admission letter from the Graduate Division stated that your admission is provisional because we need further documentation from you, you must submit the missing documents before you can begin attending classes. The documents (usually final transcripts, degree confirmation, and/or letters of recommendation) can be submitted directly to the Graduate Student Affairs Office.

☐ International Students (as applicable)
All international students must secure a visa before coming to the United States to study at UC Irvine. The most common student visa is an F1, but there are other kinds of visas available. If you already have a valid visa that allows you to study in a degree-earning program, then we would recommend that you check with the International Center to see if you should continue on that same visa or switch to an F1. There are distinct advantages to each kind of visa and the International Center can best advise you given your particular situation. If you do need to secure an F1 visa, you need to fill out an I-20/DS-2019 Request for New Graduate Students and return it to the department as soon as you are admitted to ensure that your documents arrive on time for you to begin school in late September. The Request form will be sent to you by the department. Once you return the form to the department, the International Center will process the forms to aid you in applying for a student visa.

International Center  
949-(949) 824-7249  
http://www.ic.uci.edu/

UC SHIP

All graduate students are required to have health insurance while attending UC Irvine. The university provides medical, dental, and vision coverage through the UC Student Health Insurance Plan (UC SHIP). If you can show that you have another source of comparable health insurance outside the university, you may waive participation in UC SHIP. Fees for UC SHIP are automatically assessed to your billing account unless you successfully waive out of the plan. UC SHIP forms can be found at:

http://www.shs.uci.edu/health_insurance_privacy/insurance.aspx#Waiving

Orientation

Incoming MPH students will be asked to attend two orientations before the start of instruction. One of the orientations is the Campus-wide New Graduate Student Orientation. The other orientation is specific to the Program in Public Health and is mandatory. It provides an introduction to the program and an opportunity to meet faculty and fellow students. Initial required advising will occur prior to orientation before the deadline to enroll and pay for classes.

Mailboxes and Public Health Administration Offices

Mailboxes for MPH students are located in the mail room at AIRB, 2nd Floor. The majority of our staff and faculty have offices in AIRB. Please familiarize yourself with this building, as you may need to turn in forms to the Graduate Student Affairs Office or meet with the Chair or Graduate Director at this location. You will be issued business cards after Orientation that will list an address in our office where mail can be sent to you.
Resources for Graduate Students

MPH Study Room

There is a designated study space for Public Health graduate students in Social Ecology I, Room 138. The room contains large tables and a whiteboard for group discussions. The study space is open whenever the building is open. Wireless internet is available in the building.

Departmental Computer and Printer for Graduate Student Use

If you need to print a document for class or in your role as a TA or Reader, there is a computer and a printer in SE I Room 138 that is available for your use. This printer is for Public Health graduate student use only, so please do not give out the password to other students. The username and password will be emailed to you during the first week of classes in the Fall quarter. If the printer runs out of paper or there is something wrong with the computer, please email the current Graduate Liaison to report the problem.

Housing

Information about campus housing options for graduate students can be found at http://housing.uci.edu/. Incoming students are advised to place themselves on the waitlist as early as possible to improve their chances of securing on-campus housing. Though MPH students are not included in the guaranteed housing program for PhD, JD, and MFA students, there are a wide variety of housing options in the area to suit the needs of incoming students. There are plenty of apartments in Irvine and the surrounding areas, and local homeowners around the campus often rent out rooms to students. Housing Outreach Services provides rental listings for students looking to live off-campus at http://www.housing.uci.edu/och/.

Career Advising and Other Services

There are multiple career advising resources available at UCI. The department frequently sends out emails to students with job listings (which are unsolicited) and helps to arrange career talks from local public health agencies and private companies. The UCI Career Center has a dedicated career advisor for graduate students, though you are welcome to see any of the career advisors for assistance. The Graduate Student Career Consultant is Neda Moayedi (nedam@uci.edu). The Career Center also offers mock interviews on camera, resume assistance, and workshops on the job search process.

Academic Policies and Procedures

Registration and Enrollment

Registration for classes occurs online at [http://www.reg.uci.edu/registrar/soc/webreg.html](http://www.reg.uci.edu/registrar/soc/webreg.html) using your UCInetID and password. Prior to your first quarter, you will be able to register after you are advised by email about course selection. Each quarter you will be required to see your faculty mentor to obtain approval of your proposed study list before finalizing your course schedule for the next quarter.

Late registration: Students adding classes or changing units/grading options after the end of the second week of classes will be assessed a late registration fee. Each quarter, the campus performs a census of enrollment upon which state funding is based. Please enroll before the end of the second week of classes to ensure that the university receives full-funding for your education and to avoid late fees! If you want to add a class after second week, you will need to submit a request through the Enrollment Exception Request System. **Courses can be dropped** online through the end of second week without late fees. After the end of second week, a late fee will apply and the student will need to submit a request through the Enrollment Exception Request system in StudentAccess in order to drop. A $3 transaction fee may be charged by the Office of the Registrar for each late add, drop, or change.

Full-time Enrollment

A minimum of 12 units of graduate or upper-division undergraduate coursework is required to be considered a full-time student. **Upper division undergraduate course units may count as workload units for the purposes of being considered a full-time student but ordinarily may not be used to fulfill degree requirements.** Students receiving departmental merit funding (generally for new students only) must be enrolled full-time in order to receive the funding. Teaching Assistant and Graduate Student Researcher positions require full-time enrollment. Students not enrolled full-time may jeopardize their funding for other types of aid, including need-based financial aid and university fellowships.

Campus Employment while Enrolled

The Graduate Division restricts all on-campus employment for graduate students (including staff employment) to 50% or less time while enrolled full-time. Part-time students are allowed to work 25%
Exceptions to this policy are rarely approved by the university. Limitations to on-campus employment for graduate students are explained in further detail on page 33 of the Graduate Policies and Procedures handbook. Students employed by the University of California who are interested in applying for a reduced fee waiver should pay special attention to the employment limitations at

**Obtaining Approval for New Emphasis Courses**

If you wish to use a course for your emphasis area which is not on the current list for approved emphasis courses, you must obtain advance approval from your Faculty Mentor and the Graduate Director using the Graduate Petition for Exception (available in the Current Students section of the MPH website). A **syllabus for the course must be attached to the petition.** Your Faculty Mentor must sign the form before you turn it in to the department for approval. You will be notified of the results by email if the petition is not approved. Each petition is approved on a case-by-case basis, even if multiple students are taking the same class for the same purpose. A current list of approved emphasis courses is maintained on the website. All courses being taught for the first time, as well as those from other departments that are not on the list of approved courses, must be petitioned.

**Enrolling in Excess Units**

If you wish to enroll in more than 16 units per quarter, you must obtain advance approval from your Faculty Mentor and the Graduate Director. To start the process, please print and fill out the MPH Petition for Exception and the Academic Planner. Both forms are available on our website. The main purpose of the planner is to show your mentor how many units you intend to take each quarter and not the exact titles of the courses. Your faculty mentor will discuss with you the appropriateness of your plan and make sure you understand the rigorousness of taking excess units. The petition only needs to be filled out once, even if you enroll in excess units over multiple consecutive quarters. If your cumulative GPA falls below a 3.0, you will not be allowed to enroll in excess units in any subsequent quarters until you have returned to good academic standing. Students will be informed if their schedules need to be changed as a result of poor grades from the previous quarter. You will be notified of the results of your petition by email if the petition is not approved. If your petition is approved, the Graduate Student Affairs Office will increase your unit limit in the enrollment system.

**Enrolling in Independent and/or Directed Study**

If a student wishes to undertake a research project or assist a faculty member and receive academic credit for such work, the student must enroll in independent or directed study. PH 298 is the directed study course for students assisting a faculty member with a project or pursuing a course of study under direct supervision of faculty. PH 298 is graded on a Satisfactory/Unsatisfactory (S/U) basis only. PH 299 is the independent study course for students pursuing an independent research project on- or off-campus. Given the initiative required for and independence of a 299 course, PH 299 is graded on a letter grade basis. A student may enroll under the instructor of his or her choice for either course with instructor approval. For 299, the student must fill out a PH 299 Research Proposal form and obtain departmental approval prior to enrolling. In addition to the guidelines below and any instructions on
the proposal form, instructors may also set their own expectations for the course and inform the student.

If a student has spent a significant amount of time on an independent research project while enrolled in PH 299 and can demonstrate measurable results, the faculty will consider a request by petition for one course of elective credit towards the degree for the research project. **The guidelines for considering such a request are:**

1) The student must be enrolled in PH 299 for more than one quarter. It typically takes 3-4 quarters for measurable results to be achieved in a research project.

2) The student must have co-authored an article on the research and submitted it to a peer-reviewed publication or presented the results at a conference.

3) Students are expected to read relevant research literature each quarter they are enrolled in independent or directed study.

4) The student’s supervisor or Principal Investigator for the project should submit an evaluation of the student’s work to date to the instructor of the student’s PH 299 course prior to the deadline for grade submission for each quarter enrolled.

Students who wish to enroll in PH 298 or 299 must do so by the end of the second week of classes.

**Procedures for Enrolling in PH 299:**

1) The student should contact the instructor in whose class he or she wishes to enroll and discuss the proposed research project at least two weeks before the deadline to enroll in classes without late fees.

2) Once the student has secured the instructor’s permission to enroll, a PH 299 Research Proposal form should be submitted to the department for approval.

3) Submitting Forms--Prior to starting work on a 299 project, the student must submit the Waiver of Liability form to the department. If the research requires IACUC (for animals) or IRB (for human subjects) approval, the student must provide proof of approval to the department prior to starting work on the project.

4) The student must meet any pre-requisites of the research unit (e.g. background check, finger printing, immunizations, etc), complete any required training for safety (especially with clinical or wet lab work), and/or complete any required ethics and responsible conduct of research training prior to starting work on the project.

5) Once enrolled, the student must submit a summary report of progress to the instructor at the end of each quarter of PH 299 according to the instructor’s specifications. Students should also check their grades after each quarter of enrollment in PH 299, as the course has a letter-grade option.
Advising

The graduate school experience is about more than just academics. Pursuing a graduate degree while managing work, family, and a social life is not easy, and you may feel overwhelmed at times. The good news is that the faculty and staff of the Program in Public Health are committed to your success as a student and a future public health professional. Your advisors can address issues of school/life/work balance, career goals, long-term educational goals, getting involved in the university, and much more. The best place to start if you need help is with Graduate Student Affairs. They can provide you with information about campus resources or identify Public Health faculty and staff who can answer your questions about life during and after graduate school.

Degree Requirements

The Master of Public Health (MPH) is a 60-unit degree with fourteen (14) courses taken over 5 quarters. Eight (8) courses are required of all students. In addition, each student chooses three courses in his/her emphasis and the remaining three are elective courses. The required courses are: Foundations of Public Health (PH-200), 5 core courses (one in each of the five competency areas), the practicum course (PH 295), and the graduate seminar (PH 291A-B-C). You must earn a grade of B or higher in all graduate courses.

I. MPH REQUIREMENTS
   A. CORE REQUIREMENTS
      o Public Health 200: Foundations of Public Health
      o Public Health 206: Epidemiology for MPH
      o Public Health 207A: Probability and Statistics
      o Public Health 222: Health Policy and Management
      o Public Health 244: Health Behavior Theory
      o Public Health 264: Introduction to Environmental Health Sciences
      o Public Health 291A-C: Graduate Seminar*
      o Public Health 295: Graduate Practicum in Public Health

   B. EMPHASIS AREA AND COURSES:
      *At least THREE courses worth four units each from your chosen emphasis are required
      o Environmental Health:
        o Epidemiology: 205
        o Planning, Policy & Design: 224, 231, 270
        o Public Health: 265, 275, 277A, 277B, 278, 279, 283
        o Epidemiology:
          o Epidemiology: 201, 202, 205, 232
          o Public Health: 205, 208, 209, 212, 213, 214, 281
          o Statistics: 201, 202, 203
          o Sociocultural Diversity and Health:
            o Chicano/Latino Studies: 210A, 210B, 211A, 211B
            o Psychology & Social Behavior: 258, 262, 268, 273, 274
            o Public Health: 208, 239, 242, 245, 246, 247, 248, 250, 259, 282
            o Social Ecology: 200
C. ELECTIVE MODULE
   o THREE 4 Unit Elective courses required

II. PROGRAM REQUIREMENTS

- A student must earn a total of 60 units in the courses specified above to earn an MPH.
- Please see the Public Health Graduate Student Handbook for other graduation requirements.
- This document is to be used for the student’s planning purposes only.
- The university and the department must verify completion of degree requirements.
- A grade of “B” or above must be earned in all courses in which a letter grade is assigned.
- The sequenced courses on this list count as separate courses towards the emphasis area requirements if each course in the sequence is at least four units.
- All emphasis courses must be four units each.
- Students should consult with their faculty mentors to choose courses that complement each other to create a narrowly focused depth of knowledge in emphasis.
- Courses numbered PH 290 will need to be petitioned as the topics may widely vary.
- Petitions are also needed for classes outside the department that are variable topic or being taught for the first time.
- The petition must include of copy of the course syllabus.
* PH 291 must be taken for at least 2 quarters

Normative and Maximum Time to Degree

In accordance with the policies of the Graduate Council, the Program in Public Health has set normative and maximum times to degree for the MPH program. The normative time is the average or expected amount of time it will take a student to complete the degree, and the maximum time is the most amount of time we can allow students to complete the degree.

* Maintaining residency as a university student requires enrollment in at least four units per quarter.

** Based on prior completion of advanced graduate courses in one or more competency areas of public health; may include completion of graduate practicum hours during the summer sessions.

Choosing or Switching Emphases

Each student must choose an emphasis for more in-depth studies within the MPH program. You may decide to change your emphasis after you have been exposed to various topics in public health through our introductory classes. Your emphasis selection should be finalized by the beginning of your fourth quarter in the program to ensure that you will be able to take all your emphasis courses in a timely manner. You may choose to change faculty mentors if you change your emphasis. We recommend that you meet with faculty mentors in your current and proposed emphases before deciding to change your emphasis. Please see the Graduate Student Affairs Office if you need help deciding on an emphasis.

Advancement to Candidacy

UC Irvine MPH curriculum emphasizes systematic instruction (didactics) and supervised practical applications of previously studied theory (practicum). Students must demonstrate proficiency in material covered in the lectures and seminars before they advance to candidacy for the MPH degree and enter the practicum. A two-part comprehensive examination will test knowledge of the core competency areas and how they relate to each student’s emphasis. The examination will be given in the Spring and Fall quarters to qualify students for placement in the Public Health Practicum course. The normative time to take the exam is in the Fall quarter because it allows the student adequate time to prepare for the exam without having to simultaneously learn new material. Students must apply to take the examination at least one quarter in advance.

Students who pass both parts of the comprehensive examination will be designated as “MPH Candidates” and will be eligible to apply to the Graduate Division for formal advancement to candidacy. Advancement to Candidacy is not formal and official until it has been approved by the Graduate Dean. The Advancement to Candidacy form is available from the Graduate Division website, and must be filled out by the student and turned in to the Graduate Student Affairs Office for review. Students must advance to candidacy formally at least one quarter prior to graduation, and should check their unofficial transcripts online to make sure that their advancement has been processed. Students who fail the comprehensive examination will have the opportunity for a “make-up” examination during the next
academic quarter. After two unsuccessful attempts to pass the examination, the faculty may recommend additional courses or other forms of remediation prior to a third attempt the following Spring. Inability to pass the examination after three attempts may result in dismissal from the degree program.

**Comprehensive Examination Part I: Synthesis and Depth of Knowledge**

Each student is asked to submit a written synthesis of contemporary topics within the chosen emphasis. It is expected that the resulting manuscript reflects the depth of knowledge on the topic(s) through inclusion of a comprehensive critical review of the literature, analysis of data, or policy assessment. Students will be presented with a set of public health scenarios or case studies to address. Using a problem-based learning approach, the synthesis paper should describe strategies for confronting the scenarios or solving the problems identified in the case study. It should be clear from the assessment that the student has a good understanding of the perspective of a public health professional specializing in the emphasis subject area. Specific instructions for the format of the paper will be given with the exam instructions.

Each student will have two weeks to complete the synthesis paper. The due date will be one (1) week prior to Part II of the Comprehensive Exam.

**Comprehensive Examination Part II: Breath of Knowledge**

Part II of the examination consists of the Certified Public Health exam, which is written and administered by the National Board of Public Health Examiners.

This CPH exam covers the core areas of knowledge offered in accredited schools relevant to public health, and was designed to test a person’s knowledge of the competencies. The exam will take four (4) hours to complete, and made up of 200 multiple choice questions that include matching, a series of questions, and pictorial charts.

The exam will be administered during the Fall quarter, during a specified day and time. All MPH eligible students will be required to take the exam on the designated date and time. A Registration Exam Agreement must be completed before a student is able to register for the exam.

For those students needing an alternative date based on ineligibility during Fall, arrangements will be made.

For more information on the CPH Exam, visit: [https://www.nbphe.org/CPHexaminfo.cfm](https://www.nbphe.org/CPHexaminfo.cfm)

The following documents will be due to the Practicum Coordinator prior to the Graduate Practicum and Culminating Experience Poster Presentation:

1. Completed MPH Competency Checklist
2. Completed Site Supervisor Evaluation of the Student (collected from the supervisor by the Practicum Coordinator)
3. Student's Evaluation of the Site
5. Final Practicum Report
6. Practicum Report Submission Form
7. Student Portfolio webpage

Practicum

The Coursework

Every MPH student is required to enroll in the Graduate Public Health Practicum course PH 295, an 8-unit course representing a minimum of 240 hours of fieldwork at a placement site under the joint supervision of a faculty member and a placement agency supervisor. **Students must have completed all core competency courses with a grade of B or higher, have advanced to candidacy, and have an approved practicum proposal before enrolling in PH 295.** Please see the course syllabus for more information on grading criteria and course objectives.

Procedures for Enrolling in Practicum

Students are expected to develop and submit a proposal for practicum placement during the quarter preceding enrollment in PH 295 while preparing for the Comprehensive Exam. Before submitting a proposal, students should select a few practicum sites and arrange for interviews with the site supervisors. The interview will help you and the site supervisor to decide if the organization and the anticipated day-to-day experience are a good fit for your emphasis and educational/career goals. At the interview, be sure to discuss specific projects or initiatives that you could undertake at the site. You will need to include your plans in your placement proposal. Please remember that the timeline for your project should not be structured in a way that would require you to work more than 40 hours per week.

If you would like to complete your practicum at a site that is not listed in our catalog, please email the contact information of your potential site supervisor to the Practicum Coordinator. Please keep that this process is lengthy, so plan in advance if you would like to request for a site that is not listed in the catalog.

Once you have accepted a placement site, you may begin working on a project proposal with the help of your faculty mentor and site supervisor. Once both parties approve your project proposal, you must fill out a Graduate Practicum Enrollment form along with your written proposal. Once this form has been submitted with the necessary signatures and attachments, you may begin your Practicum hours. If you plan on being enrolled in the course during the current quarters, instructions to do so will be sent to you by the Practicum Coordinator. Please note that PH 295 may not be added past Friday of Week 10 of any quarter. If you plan on being enrolled in PH 295 the following quarter, you will need to be enrolled in Field Study units during the current quarter.

Timeline for Practicum Enrollment Procedure

**Step 1: Placement Site**

1. After the successful completion of your core competency courses and the comprehensive exam, you may begin researching and contacting sites of interest
   a. Please view the Graduate Practicum Catalog for approved sites
2. Prepare a resume and cover letter to send to sites of interest
   a. For assistance with this, please visit the Career Center in Student Services for resources and information
3. During your interviews, make sure to inquire about projects you could do as part of your Practicum, or projects they may be interested in you carrying out
4. Once you have been offered an internship, please notify all other sites regarding your internship placement
   a. Please ensure that you notify all other sites regarding your internship placement

**Step 2: Practicum Proposal** (You may only begin this step once you have secured a placement site)

1. Begin working on your Practicum Proposal once you have accepted an internship at an approved site
   a. For information on what should be included on your proposal, please refer to the PH 295 Syllabus posted online
   b. Consult with your site and faculty mentor regarding project and proposal
2. Once you have a finalized a project proposal, send draft to site supervisor
   a. If he/she approves, please have them sign their section of the Practicum Proposal Approval form
   b. If any changes are requested, please make the appropriate changes then submit for approval
3. Once your site supervisor has approved and signed his or her portion of the Practicum Proposal Approval form, send project proposal to your faculty mentor
   a. If he/she approves, please have them sign their section of the Practicum Proposal Approval form
   b. If any changes are requested, please make the appropriate changes then submit for approval

**Step 3: Enrolling in Practicum**

In order to enroll in PH 295, please submit the following completed, signed, and/or approved forms (all forms can be found online):

1. Practicum Proposal Approval form
2. Graduate Practicum Enrollment form
3. UC Waiver of Liability form

You will get an authorization code to add your faculty mentor’s PH 295 section for the applicable quarter; you will be required to enroll in eight (8) units of PH 295.

**During Practicum**

It is the responsibility of the student to keep accurate practicum hour records. A total of 240 hours must be completed for the graduate practicum. You may arrange to complete your hours over a two-quarter period if it better suits your tasks at the site. In fact, some sites may require a two-quarter commitment. We do not recommend that you spend more than 24 hours per week at your site unless it is summer and you have no other classes. The maximum number of practicum hours you may earn per week is 40.
It is recommended that you set up a schedule of weekly meetings with your supervisor to track your progress on your project and discuss any problems that arise. Please refer to the PH 295 syllabus for information on course meetings and class assignments. Try to learn as much as you can about the organization and the best way to work effectively in your new setting. Attend a site orientation if one is offered or ask your supervisor for a site handbook. Your site supervisor will receive a site supervisor’s handbook from the Program in Public Health to guide him or her in supervising your practicum experience.

You may also be asked to share your experiences in your practicum with your classmates and your faculty supervisor (the instructor for your section of PH 295). If you have a problem at the site or with your site supervisor that cannot be resolved, please inform the Graduate Student Affairs Office and your faculty supervisor.

**Suggestions for Practicum Site Projects**

The following are examples of major categories of practicum projects. Your project is not limited by these suggestions, and could be a combination of different activities or objectives that are all focused around a central goal.

**Program Design:** The MPH student designs or makes a substantive contribution to the design of a public health-related program that could be implemented at the practicum site, including instructions, procedures, manuals, and materials.

**Program Implementation:** The MPH student makes a substantive contribution to the implementation of a program already planned at the practicum site.

**Data Analysis:** The MPH student completes a substantial analysis of data collected by the practicum site on a health-related topic and reports the results.

**Community Intervention:** The MPH student designs and implements a community intervention supported by the practicum site.

**Program Evaluation:** The MPH student undertakes evaluation of an existing program to evaluate effectiveness and outcomes of this program.

**Health Policy Statement/Advocacy:** The MPH student develops a health policy position paper to support the mission of the practicum site, and advocates for its approval.

**Completing your Practicum**

At the end of the practicum, students are expected to integrate concepts and principles of public health gained through their coursework with translational field experience. The grade for the practicum course will be based on the preparation and submission of a written report and participation and the MPH Culminating Experience poster presentation, for which guidelines can be found in the PH 295 syllabus. Site supervisors will be asked to complete an evaluation of your performance at the site. The form will be sent to them by Public Health Practicum Coordinator. As the student’s hours at the site come to a close, please remind the Practicum Coordinator to send the evaluation form to the student’s site supervisor, and remind site supervisor to complete the evaluation. Student will also be asked to complete an evaluation of the site.

*UCI Population Health and Disease Prevention*
IV. Additional Information

- If a student does not complete all of yours hours and requirements for Practicum the quarter you are enrolled in PH 295, you will have to complete them the following quarter. You will receive an “Incomplete” (I) in PH295 for the quarter you are enrolled in it until all of your requirements are done.

- If a student plans on being on filing fees the quarter after you have enrolled in PH 295 to complete hours and all requirements to receive credit for Practicum, he or she must submit UC Irvine’s Graduate Division Filing Fees form to the Graduate Student Affairs Officer. Once the form has been approved, the student will need to submit it to Graduate Division for final approval. Please be aware that the deadline for this form is Friday of the 3rd week of classes of the quarter you plan on going on filing fees.

*Please note that students may only be on filing-fees one time. Failure to complete all requirements of Practicum the quarter the student is on filing feel that will require him or her to stay another quarter will require him or her to enroll in courses and pay full-time fee status.

- If a student plans on being on Part-Time fee status the quarter you are enrolled in PH 295, he or she must submit UC Irvine’s Graduate Division Part-Time Reduced Fees Status form to the Graduate Student Affairs Officer. Once the form has been approved, he or she will need to submit it to Graduate Division for final approval. Please be aware that the deadline for this form is Wednesday of the 3rd week of classes of the quarter the student plans on going on Part-Time fee status.

Important Practicum Policies

1. Students are eligible to begin the Practicum process once he or she has passed both parts of the comprehensive exam.

2. Hours cannot be counted towards the 240 hour requirement until after the student’s project proposal must be approved by their faculty mentor and site supervisor.

3. Students are not allowed to start work at sites that have not been granted approval. In order to submit a course enrollment form, students must first be accepted by the placement site and project proposal must be approved by their faculty mentor and site supervisor.

4. Practicum site supervisor may not be a salaried faculty member at UCI or any other university. In most circumstances, you can find a non-faculty member at the site who can assume a supervisory role in place of the faculty member. This non-faculty member supervisor must be in place before the practicum project will be approved. Exceptions to this policy will be considered.

5. Students are required to ensure that their site supervisor submits an evaluation form to Public Health at the end of the fieldwork experience.
6. If you are conducting research as part of your practicum project, you must obtain IRB (for human subjects) or IACUC (for animals) approval as appropriate. The university provides information on obtaining this approval if your site supervisor cannot assist you in this process. Information on IRB or IACUC approval can be found at http://www.research.uci.edu/ora/rcr.htm.

Master of Public Health Poster Presentation

Students will create a poster on their report that will be presented at the departmental poster presentation session. The poster will be available for viewing by all faculty members, students, staff, and the general public.

Poster formatting guidelines are posted on the program website, please refer to those guidelines regarding content, structure, and presentation day expectations. The departmental poster session will be held during the first few days of finals week of the respective quarter, but this may vary depending on necessity.

A student may petition to not participate in the departmental poster session if he or she has an extenuating circumstance* which will be reviewed by Student Affairs and the student’s faculty mentor. Official documentation for validation of the extenuating circumstance will be required. Contact the Practicum Coordinator for the petition.

*Please note that an extenuating circumstance is an event that is outside a student’s control. Thus, some petitions may be denied if they are incomplete, lack valid documentation, and/or are not considered an extenuating circumstance.

Graduation Requirements

The MPH degree will be awarded only when the following requirements are satisfied:

1. A minimum of three (3) quarters of academic residence.
2. Not less than 60 units of coursework approved by a faculty mentor. At least 8 units of PH 295 must be taken to fulfill the practicum requirement.
3. Of the 60 units required for the MPH degree, no more than 24 may be courses graded Satisfactory/Unsatisfactory (S/U), including the practicum (8 units) and the graduate seminar (4 units).
4. Of the 60 minimum units needed for the degree, a student will be required to take 12 units in the emphasis to satisfy depth, and 20 units in the core competency areas to satisfy breadth. To assure that its students are familiar with the cross-cutting knowledge areas of public health, the Program in Public Health requires that all MPH students take a “Foundations” course and enroll in the “Graduate Seminar” series.
5. At least a B (3.0) grade point average in all work completed in graduate standing.
6. All core competency courses must be passed with a minimum grade of B or above.
7. A comprehensive examination given by the faculty of the student’s emphasis.
8. Public Health Practicum Experience: Students are required to complete a 240-hour supervised internship while registered at UC Irvine. The practicum follows the first three academic quarters of academic study in public health and advancement to candidacy. For physicians, practicum
training programs may be devised to meet certification requirements for medical board specialties.

9. MPH Culminating Experience: The culmination of the degree is a presentation by the student to a committee of faculty in the student’s emphasis area.

**Academic Probation/Disqualification**

Students may be placed on academic probation for unsatisfactory progress toward the completion of degree requirements. Unsatisfactory progress may include, but not be limited to the following:

1) an overall grade point average below 3.0;
2) failure to complete courses or examinations satisfactorily within the period of time specified by the graduate program;
3) failure to pass a required examination in two attempts.

The Graduate Director or Graduate Student Affairs Officer may initiate procedures to place the student on academic probation. In such cases the student typically will receive written notice of the deficiencies and a deadline for remedying these deficiencies (i.e., for completing specific degree requirements). Failure to meet this deadline can result in a petition to the Dean of Graduate Division to terminate the student from graduate study in the program.
Administrative Policies and Procedures

It is the responsibility of the student to know and follow the regulations and requirements for maintaining good academic standing and for making satisfactory progress towards the degree. The UCI General Catalogue (available online only) contains all of the detailed information you need to plan your academic career here. Please obtain a copy and read it carefully. UC Irvine has a number of policies concerning graduate studies. These can be found in the UC Irvine 2015-16 General Catalogue, which is available as on the web in HTML at http://catalogue.uci.edu/. The Graduate Division describes campus-wide graduate program policies in the Catalogue (http://catalogue.uci.edu/graduatedivision/).

The text of the following document has been taken from "Graduate Students’ Rights and Responsibilities" as approved by the Graduate Council. For the sake of brevity and timeliness, the URLs to the references used in this document have been removed. If you are interested in the URLs of available references for any of the rights and responsibilities listed, please see the original text: http://students.socseo.uci.edu/sites/students.socseo.uci.edu/files/shared/grad_rights.pdf.

Graduate Students' Rights and Responsibilities
University of California, Irvine
(UCI Graduate Council - April 20, 2004)

Note: The term "student" means an individual for whom the University maintains student records and who: (a) is enrolled in or registered with an academic program of the University; or (b) has completed the immediately preceding term and is eligible for re-enrollment, including the recess periods between academic terms; or (c) is on an approved educational leave or other approved leave status, or is on filing-fee status. (UC/UCI Student Policy Manual, section 14.40)

Preface

Students are members of both society and the academic community with attendant rights and responsibilities. (UC/UCI Student Policy Manual, section 101) The purpose of this document is to outline some of these rights and responsibilities, and to provide references to the policies that define them.

This document covers UC and UCI policy, but is not exhaustive. In particular, graduate students may also have other rights and responsibilities associated with the academic program in which they are enrolled. Academic units are responsible for providing graduate students with all information on such rights. Students are also expected to request such information should it not be made readily available.

Rights

Graduate students who are registered at the University of California, Irvine have the following rights:

- To be free from discrimination in matters relating to admission, access, and treatment in University programs and activities. (UC/UCI Student Policy Manual, Appendix C)
• To be involved in the governance of both administrative and academic areas of the university. (UC/UCI Student Policy Manual, sections 120 and 70)

• To be assured of reasonable confidentiality in their communications with professors except in circumstances relating to violation of University policies.

• To refuse to perform tasks if those tasks are not related to their course of study or their own professional or academic development.

• To be informed of the options for financial support available to them, and the eligibility requirements for each. Sources for this information include the UCI Office of Graduate Studies, the UCI Office of Financial Aid and Scholarships, and students' academic units.

• To be informed of the criteria for, and terms of, employment as Teaching Assistants/Associates (TAs) and Graduate Student (Assistant) Researchers (GS(A)Rs). Sources for this information include the TA union contract, the Academic Personnel Manual, and Graduate Policies and Procedures, "Academic Appointments and Graduate Student Employment".

• To have all academic decisions affecting their academic standing, including the assignment of grades, based upon academic considerations only, and administered fairly and equitably under policies established by the Academic Senate. In professional curricula, such decisions may include consideration of performance according to accepted professional standards. (UC/UCI Student Policy Manual, section 171.09)

• To be provided with well-defined criteria for completion of degree requirements at the time of admission. (Graduate Policies and Procedures, "Academic Advisement and Evaluation")

• To be advised in a timely manner of all changes in the rules, policies, and procedures related to their academic program. (Graduate Policies and Procedures, "Academic Advisement and Evaluation")

• To be required to complete only the degree requirements which were published in the UCI Catalogue at the time of admission. (If the requirements should change after the student's admission, some degree programs may give the student the option of fulfilling the new requirements instead.)

• To be informed of their degree program's policy on normal and maximal times to degree.

• To be asked to complete program milestones (comprehensive and qualifying exams, advancement to candidacy, dissertation/thesis topic defense, dissertation/thesis final defense) at times which are in accordance with departmental policy.

• To regular evaluations of their progress toward their degree objective. (Graduate Policies and Procedures, "Academic Advisement and Evaluation")

• To make progress toward their degree goal without undue delay on the part of faculty.
• To make certain decisions independently of their faculty advisors. This right is subject to restrictions imposed by the university and the student’s department/program, such as the policies on satisfactory progress and time-to-degree. These include the right to:
  
  o Choose a thesis/dissertation advisor.
  o Choose a thesis/dissertation topic. A student’s advisor can veto a topic that is outside his/her area of expertise.
  o Be consulted on the membership of their research committee.

Note: Just as a student has the right to choose an advisor, an advisor also has the right to decline a request to serve in that capacity. Also, if a student and advisor cannot agree on one of these points, either may choose to sever the advisor/advisee relationship. In particular, these rights do not force an advisor to retain a student who refuses to accept the advisor’s guidance in these matters. It is also important to note that these rights do not force a degree program to retain a student if no qualified individual is willing or able to act as the student’s advisor.

• To be free from University discipline for actions committed involuntarily or under duress. However, violations committed under the influence of drugs, alcohol, or illegal substances will be subject to discipline. (UC/UCI Student Policy Manual, section 171.06)

• To be able to access their academic file as specified by the UC/UCI Student Policy Manual, section 130.40.

• To be informed of policies and procedures for procuring on-campus housing, including information on availability, expected time on wait list, limitations on stay (including restrictions, if any, imposed by academic policies), and restrictions on eligibility.

• To be consulted on matters affecting both the academic and nonacademic experiences of students, and especially those decisions which directly affect their welfare, through drawing upon official student representation, as well as additional means for seeking student input as appropriate. (UC/UCI Student Policy Manual, sections 171.01 and 171.02)

• To request an investigation into a possible conflict of interest if the student’s advisor has a financial interest as defined in Section 028 of the Academic Personnel Manual in an outside entity related to a project on which the student is working. Additional sources of information on this and other types of conflict of interest may be found at the following websites: the Office of Graduate Studies, the UCI Graduate Policies and Procedures, the UCI Conflict of Interest Home Page and the UC/UCI Student Policy Manual.

• To have access to basic outpatient health care services on any University of California campus, under conditions that apply to students registered on that campus. (UC/UCI Student Policy Manual, section 171.15)

• To be informed of all these rights upon enrolling at UCI.

• Students with disabilities also have additional rights that are outlined in the Academic Senate Manual's Academic Policy for Handicapped Students.
Responsibilities

Student conduct is governed by policies described in the UC/UCI Student Policy Manual. Graduate students should be aware of the expectations for their behavior as students, and of their responsibilities as instructors regarding the behavior of their students.

- Graduate students should become familiar with the general provisions of UCI's student conduct policies. In addition to the UC/UCI Student Policy Manual, other sources for this information include the UCI Academic Senate Manual, the UCI Administrative Policies and Procedures, the Graduate Division website, and the appendices of the UCI Catalogue. Among the policies of concern are those dealing with:
  - academic honesty
  - integrity in research
  - sexual harassment
  - computer and network use
  - hazing
  - student conduct and discipline
  - principles of community
  - substance abuse
  - weapons
  - discrimination

- Graduate students are expected to report their research results accurately and honestly, and to uphold ethical norms in their research methodology.

- Teaching Assistants/Associates and lecturers may wish to review the Faculty Code of Conduct.

- All international students new to UCI are required to check in with the UCI International Center when they arrive in Irvine. Students should bring their I-20/DS-2019, passport with visa stamp, and I-94 card and address information if available.

- Students who violate University policies and procedures may be subject to disciplinary procedures published in the UC/UCI Student Policy Manual, Section 103.

- University employees (including graduate students serving as TAs, lecturers, or GSRs) who violate University policies and procedures may be subject to disciplinary procedures published in the Academic Personnel Manual, the Staff Personnel Programs Manual, the Manual of the Academic Senate, or the collective bargaining agreements as appropriate. (UC/UCI Student Policy Manual, section 40.20)

- ALSO NOTE: Consent to remain on campus may be withdrawn pursuant to the procedures set forth in Section 900-20 of the UCI Policy and Procedures Manual implementing Penal Code Section 626.4 and 626.6. (UC/UCI Student Policy Manual, section 40.20)
Guidelines

Certain aspects of the experience of being a graduate student are not matters of formally defined policy, but are reflections of UCI's academic, social, and professional cultures. This section gives some guidelines on these matters.

- Generally, a professor should not discuss a student's performance or behavior with other students. Discussion of the student's performance among faculty should be limited to the student's academic performance and qualifications as a graduate student.

- Graduate students can usually expect to be listed as a co-author of publications which involve significant contributions of ideas or research work from the student. However, specific practices may vary by discipline and academic unit.

- Graduate students are expected to devote an appropriate amount of time and energy toward achieving their degrees within the standards for "normal time" that apply to their degree program.

- Graduate students are expected to take the initiative in asking questions that promote their understanding of academic requirements, University policy, and financial support.

Resources (Documents and Organizations)

The organizations and documents listed below may be of use in helping graduate students to understand University policies that relate to their rights and responsibilities:

- Departmental Graduate Counselors and the Associate Dean for Graduate Affairs in the Office of Graduate Studies

- UC/UCI Student Policy Manual (section 170.00): fees (including refund schedules), privacy policies, disclosure of information, "time to degree" policies

- UCI Graduate Policies and Procedures: information on academic policies and related administrative procedures, including but not limited to:
  - transfer of credit
  - residency issues
  - leave of absence/part-time enrollment
  - academic appointments and graduate student employment
  - academic standards
  - examinations

- UCI Catalogue Appendix: information on access to, and release of, student records

- UCI Associated Graduate Students: the official representative body for all graduate students and professional students at UC Irvine
• UCI Office of Equal Opportunity and Diversity: policies and procedures regarding discrimination, retaliation and sexual harassment

• UCI International Center: information and assistance for international students, faculty, and visiting researchers

• UCI Disability Services Center: information and assistance for students with disabilities.

Resolving Conflicts

The organizations listed below assist in resolving disputes within the University community:

• Office of Graduate Studies: gives guidance on formal and informal methods of resolving conflicts.

• UCI Ombudsman: independently, objectively, and confidentially assists in mediating and resolving conflicts.

• UCI Mediation Program: a volunteer program for dispute resolution, facilitated through the Ombudsman Office.

• UCI TA Union - the UAW (International Union, United Automobile, Aerospace and Agricultural Implement Workers of America [UAW] AFL-CIO and its Local Union 2865) represents UCI graduate students that have teaching assistantship, reader, or tutor appointments (whether or not they are members of the union).

• UCI Dean of Students: investigates allegations of physical abuse, threats of violence, or conduct that threatens the health or safety of any person or university property.

Problems relating to academic policies should be resolved at the level of the academic unit where possible. If this is not possible, such problems should be addressed in accordance with the Student Academic Grievance Procedures.

Academic Standards

The following excerpt is taken from the UCI General Catalogue on Scholastic Requirements for Graduate Students:

A graduate student is expected to make satisfactory progress toward an approved academic objective, as defined by the faculty of the program in accordance with policies of the Graduate Council, to maintain a satisfactory grade point average for all work undertaken while enrolled in graduate study, and to maintain academic progress within the required time to degree as established by the respective academic program. Satisfactory progress is determined on the basis of both the recent academic record and overall performance. A graduate student normally is expected to complete satisfactorily at least eight units of academic credit applicable to the graduate program in each regular academic session (unless on an approved leave of absence), and satisfy all requirements of the academic program according to an approved schedule. However, a UCI course in which a grade of B- is earned may be accepted, via a formal petition process, in partial satisfaction of the degree requirements if the student has a grade point average of at least 3.0 in all courses applicable to the degree. Graduate students may not apply courses graded Pass/Not Pass toward any degree or satisfactory progress requirements. A grade point average below the B level (3.0 on a 4.0 scale) is not satisfactory, and a student whose grade point average is below that level is subject to academic disqualification.

A student's academic progress ordinarily is evaluated on the basis of the academic record, time-to-degree, and the professional judgment of the faculty. A few weeks after the end of a quarter, an updated copy of each enrolled student's permanent academic record is available from the Registrar. This record lists all UCI courses for which a graduate student was enrolled (including courses taken through the Intercampus Exchange Program), the grades assigned, and the cumulative grade point average. This record also includes formal candidacy for an advanced degree, degrees conferred, certain examinations passed, unit credit accepted from other institutions, and other important academic information.

A graduate student who has not demonstrated satisfactory academic progress is not eligible for any academic appointment such as Reader, Tutor, Graduate Student Researcher, Teaching Associate, or Teaching Assistant, and may not hold a fellowship or other award which is based upon academic merit.

Academic Dishonesty

The following excerpt from Graduate Policies and Procedures explains the university's position on academic honesty. We strongly recommend that you familiarize yourself with the academic dishonesty policies and procedures. The policies apply equally to electronic media and print, and involve text,
images, and ideas. The policy in its entirety can be found at http://www.senate.uci.edu/senateweb/default2.asp?active_page_id=754.

UCI Academic Senate Policy on Academic Honesty
(Approved by the Irvine Division on 6/2/88, revised 12/12/96; revised 10/12/00)

The consequences of failing to uphold the academic honesty policy are published in the UCI General Catalogue, and are also available at http://catalogue.uci.edu/appendix/#academichonestytext.

Students are expected to become familiar with this policy. Students who fail to uphold their fundamental academic obligation are subject to consequences that might range from lowering a grade to campus-wide sanctions, up to and including dismissal. Examples of conduct that fall under the aegis of the policy on academic honesty include, but are not limited to, plagiarism, cheating, stealing of exams, falsifying the record of their work, or collusion in such dishonest activities. When faculty suspect academic dishonesty, they need to follow due process guidelines and investigate their suspicions promptly and fairly. Minimally, due process requires that suspected students be given clear and prompt notice of the suspicion and the opportunity to confront or rebut the evidence that gave rise to the suspicion. Some procedures for implementing the policy can also be found in the UC-UCI document Policies Applying to Campus Activities, Organizations, and Students (http://www.dos.uci.edu/conduct/uci_policy.php).

Financial Support

Thirty-three percent of the Professional Degree Supplemental Tuition paid by MPH students is used to support students in the form of financial aid. This amount, however, is only a small portion of the actual cost of the degree. The MPH is a professional degree program, and thus students are expected to be largely self-supporting. As a department, we want to be as helpful as possible in your search for financial aid. The Graduate Student Affairs Office can answer general questions about how the aid process works and is happy to provide you with information on where to look for aid. If you have specific questions about your applications for federal or UCI financial aid, you may contact Van Pham in the central campus Financial Aid office by calling 949-824-9782 or emailing her at phamvt@uci.edu. Please also see the Financial Aid section of our MPH website, which contains links to internal and external fellowships, scholarships, and employment listings.

To help you in your search for financial support, we have provided the following information and resources:

Sources of Funding for MPH Graduate Students

Need-based Aid and Loans

Need-based aid and loans can come from private organizations or from the government. Banks can provide private loans and organizations may offer need-based scholarships for exceptional students. Applicants wishing to receive need-based aid (including government aid and/or federally subsidized loans) must fill out a FAFSA (Free Application for Federal Student Aid) at www.fafsa.ed.gov. You must fill out the FAFSA by the California priority deadline to receive full consideration for many forms of aid, including scholarships and UCI Grants. We strongly recommend that you fill out a FAFSA even if you do
not think you are eligible for aid. International students will not be able to complete the online FAFSA, but should inquire with the department and our Financial Aid Officer after admission. While international students are not eligible for federal financial aid, they may be eligible for certain types of university fellowship funding, departmental awards, and/or employment as a teaching assistant or graduate student researcher.

Fellowships and Grants

Fellowships and grants are awards that do not have to be paid back. The award can be institutional (offered by the university or by the Program in Public Health) or "portable" (external funding offered by an organization or agency). Many deadlines for fellowships and grants occur early in the academic year, so it is important to prepare your materials in advance and apply early. For departmental grants, the Graduate Student Affairs Officer will notify you of any deadlines and application procedures.

We also suggest that students visit this page on Financing your Degree from the Association of Schools and Programs of Public Health:

http://www.aspph.org/study/financing-your-degree/

On- and Off-Campus Employment

You may also wish to pursue part-time or full-time employment to help pay for school. If you wish to work full-time, we strongly encourage you to attend school part-time to ensure that you have adequate time to study for your classes. To search for jobs on- or off-campus, we recommend that you try ZotLink at http://www.career.uci.edu/zotlink.aspx, the job listings database of the UCI Career Center. You must be a current student and have a UCInetID login to search the database. On-campus jobs are conveniently located and may be more willing to accommodate your course schedule. There are also a number of off-campus public health-related organizations and businesses in Orange County that may be able to provide you with employment opportunities.

Teaching and Research Assistantships

Teaching and research assistantships are paid positions that support UCI faculty with their undergraduate teaching and principal research responsibilities. Though students in the MPH program should not expect to be teaching or research assistants while taking classes, opportunities may exist for a select number of qualified students each year. It is often difficult for first-year MPH students to obtain these positions because of a lack of teaching experience and knowledge in the discipline. However, students may send in updated resumes as they acquire more public health knowledge and experience to improve their chances of obtaining a position. At UCI, the most commonly paid assistantship positions are: Teaching Assistant (aka TA), Reader, and Graduate Student Researcher (aka GSR or RA). If you are interested in a Teaching Assistant or Reader position, please email your resume to Stephanie Leonard at stephapl@uci.edu. For GSR positions, students should make arrangements with faculty individually. Teaching Assistant and Graduate Student Researcher positions require full-time enrollment. Students with Reader positions may be eligible for federal work study funds from the Graduate Division, and are allowed to retain their position during part-time enrollment.

Getting Involved with the University and the Program in Public Health

As a graduate student in the Program in Public Health, there are numerous opportunities available for you to become involved in the university and in your home department. We know that many of you were active in community service and school organizations at your undergraduate institutions, and we hope that you will continue to do so here at UC Irvine. This guide lists just a few of the opportunities you will have to get involved and give something back to your fellow students, staff, faculty, and community.

Departmental Committees and Positions

Curriculum Committee

The Curriculum Committee meets periodically to plan and coordinate the Public Health curriculum and has one student member. The student member will be chosen by Public Health faculty to convey student concerns about the MPH curriculum.

Graduate Liaison

This student is elected by the graduate students each Fall to represent all graduate students in the program. While we welcome feedback on our program from all students, the Graduate Liaison can bring an issue to the attention of faculty and staff if a student does not want to convey his or her opinion directly. The Graduate Liaison represents the students as the student member of the Graduate Committee, which oversees Public Health graduate programs, and attends monthly faculty meetings. This student also assists the department in coordinating visits from colloquium speakers if funds allow. The Graduate Liaison will be elected by the end of the fall quarter.

Campus Organizations

Public Health Association

The Public Health Association (PHA) was organized by students in our undergraduate majors to promote awareness of public health issues on our campus and in the community and to educate its members about educational and career opportunities in the field. There is a Graduate Student section of the PHA with its own officers and activities. More information can be found at http://http://www.phagraduci.org/.

SIPHERS (Students at Irvine Public Health Emergency Response and Surveillance)

Members of SIPHERS work closely with the Orange County Health Care Agency to provide assistance to the agency during surge periods such as outbreaks. The students periodically visit the agency during the school year to train with agency employees and attend seminars.

Associated Graduate Students

The Associated Graduate Students (AGS) is the recognized graduate student government at UCI. AGS plans social activities, advocates for graduate students in campus planning and policy, and re-negotiates
the GSHIP insurance plan annually. All graduate students in good standing are eligible to sit on AGS committees. The Council, the legislative arm of AGS, also has one seat available for every 100 students in each school. If you are interested in becoming a council member, email vpadmin@ags.uci.edu. The GSHIP council might be an especially informative experience for those considering careers in Health Policy and Management.

Non-Discrimination Policy

The University of California, in accordance with applicable Federal and State law and University policy, does not discriminate on the basis of race, color, national origin, religion, sex, gender identity, pregnancy*, disability, age, medical condition (cancer-related), ancestry, marital status, citizenship, sexual orientation, or status as a Vietnam-era veteran or special disabled veteran. The University also prohibits sexual harassment. This nondiscrimination policy covers admission, access, and treatment in University programs and activities.

Inquiries regarding the University's student-related nondiscrimination policies may be directed to: Kirsten K. Quanbeck, Director, Office of Equal Opportunity and Diversity, 4500 Berkeley Place, Irvine, CA 92697-1130; Phone: (949) (949) 824-5594; e-mail: eod@uci.edu

*Pregnancy includes pregnancy, childbirth, and medical conditions related to pregnancy or childbirth.

The information in this publication will be made available in alternative formats for people with disabilities, upon request. Requests should be directed to the Disability Services Center, telephone (949) (949) 824-7494 (voice); (949) 824-6272 (TDD). The campus and all buildings are accessible by wheelchair.
Sample Plans

These plans are meant as samples only to give you an idea of when to expect to take certain types of courses in the MPH program. New courses may be added at any time, and not all current courses are offered every year, so you will want to consult the Public Health office and the Schedule of Classes for actual course schedules.
