List of Approved Emphasis Courses

The sequenced courses on this list count as separate courses towards the emphasis area requirements if each course in the sequence is at least four units (unless noted otherwise). Students should consult with their faculty mentors to choose courses that complement each other to create a narrowly focused depth of knowledge in the emphasis area. Courses numbered PH 290 will need to be petitioned as the topics may vary widely. Petitions are also needed for classes outside the department that are variable topic or being taught for the first time. The petition must include a copy of the syllabus of the course.

Environmental Health
265 Advanced Environmental Health Sciences
275 Risk Assessment
277A&B Target Organ Toxicology I and II
278 Industrial Toxicology
279 Special Topics in Environmental Health
283 Advances in GIS for PH
